### DETAILED ACTION

The prosecution has been reopened.

#### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 15-22, drawn to a method for licensing external processes on a server comprising generating an electronic license, classified in class 705/59, subclass 221.
- II. Claims 1-14, drawn to a system for licensing external processes on a computer comprising an electronic license, classified in class 705, subclass 54.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a method for licensing external processes on a *server* comprising *generating* an electronic license. Invention II has separate utility such as a system for licensing external processes *on a computer comprising an electronic license*. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
